## RISK MANAGEMENT STRATEGIES

Risk associated with Fixed income securities	<ul style="list-style-type: none"> <li>• <b>Market Liquidity Risk and Liquidity Risk on account of unquoted and unlisted securities:</b> The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity. There is good secondary market liquidity in government securities. As far as other long dated fixed income securities are concerned, the endeavour will be to invest in high quality names example bonds issued by public sector entities. Market Liquidity Risk will be managed actively within the portfolio liquidity limits. The first access to liquidity is through cash and fixed income securities. The investment in unlisted securities will be minimal.</li> <li>• <b>Credit Risk:</b> Credit Risk associated with Fixed Income securities will be managed by making investments in securities issued by borrowers, which have a very good credit profile. The Risk and Quantitative Analysis (RQA) team assigns limits for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.</li> <li>• <b>Term Structure of Interest Rates (TSIR) Risk:</b> The Investment Manager will endeavour to actively manage the duration based on the ensuing market conditions. In the case of DSPBRCM10YGF, the Scheme is expected to have duration based on the underlying securities. The interest rate risk cannot be eliminated and it exists as it is the primary feature of the scheme by providing investors access to a higher interest rate risk portfolio, which would benefit in a declining interest rate environment.</li> <li>• <b>Rating Migration Risk:</b> The endeavour is to invest in high grade/quality securities. The due diligence performed by the Risk and Quantitative Analysis (RQA) team before assigning credit limits should mitigate company-specific issues. The RQA team also monitors these limits after they have been assigned, on an ongoing basis.</li> <li>• <b>Re-investment Risk:</b> The Investment Manager will endeavour that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.</li> <li>• <b>Risks associated with bank and PSU debt:</b> The endeavor will be to invest in debt securities of banks having sound credit profiles with strong balance sheets, healthy asset quality and managements having a proven track record of managing growth. Moreover, banks in India have typically enjoyed some degree of systemic support, especially public sector banks which receive periodic equity capital infusion from the GoI. Hence, banks typically enjoy high credit ratings. Similarly, the schemes would invest in PSU's which either have healthy standalone profitable business models, or perform critical functions for the GoI ensuring continued support through equity infusions, guarantees etc.</li> </ul>
Market Risk related to equity and equity related securities	<ul style="list-style-type: none"> <li>• The Investment Manager endeavours to invest in companies, where adequate due diligence and research has been performed by the Investment Manager. As not all these companies are very well researched by third-party research companies, the Investment Manager also relies on its own research. This involves one-to-one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance.</li> </ul>
Risk associated with floating rate securities	<ul style="list-style-type: none"> <li>• The price discovery process in floating rate securities is very limited, which leads to restricted market liquidity as market participants are not able to price these securities properly. One of the main reasons for lack of price discovery is the valuation of basis risk embedded in these securities. Besides this the current guidelines for valuation of floating rate securities treat such securities at par with fixed income securities with the same terminal maturity. Incremental investments in floating rate securities are going to be very limited.</li> </ul>
Applicable to DSPBRBPDF, DSPBRIOF, DSPBRMMF, DSPBRSTF	<ul style="list-style-type: none"> <li>• <b>Risk associated with investments in repo of corporate debt securities:</b> The Investment Manager will endeavor to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles. These could include SEBI regulated mutual funds, RBI regulated Banks, Non Banking Finance Companies, Primary Dealers and IRDA regulated Insurance companies. Corporates for whom credit limits have been assigned are eligible counterparties. These corporates should have a minimum investment grade credit rating. For new counterparties, approval from Head - Risk will be taken and an assessment will be done by the Risk &amp; Quantitative Analysis team. The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.</li> </ul>
Applicable to DSPBRBaIF, DSPBRMIPF, DSPBROF, DSPBRITF, DSPBREF, DSPBRTF, DSPBRTSF, DSPBRNRNEF, DSPBRMCF, DSPBRF25F and DSPBRSMF	<ul style="list-style-type: none"> <li>• <b>Risks associated with mid-cap, small-cap and micro-cap companies:</b> The Investment Manager endeavours to invest in companies, where adequate due diligence has been performed by the Investment Manager. As these companies are not very well researched by third party research companies, the Investment Manager relies on its own research. This involves one to one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance.</li> </ul>
Applicable to DSPBRF25F	<ul style="list-style-type: none"> <li>• <b>Risk factor associated with security concentration:</b> This Scheme has a security concentration risk as it will normally hold equity and equity-related securities including equity derivatives, of upto 25 companies. The intrinsic nature of the portfolio will represent high conviction portfolio weights. The primary nature of the Scheme is to have high conviction portfolio, which may introduce higher security concentration risk. Although the Scheme is less diversified in terms of the number of securities, the Scheme has the flexibility of investing in diverse sectors. This would provide diversification across sectors and the Investment Manager would have the flexibility to diversify the holdings and mitigate risks. The Investment Manager will endeavour to achieve diversification through non-similar stocks and/or factors that could impact the underlying portfolio.</li> </ul>
Applicable to DSPBROF	<ul style="list-style-type: none"> <li>• <b>Sector Concentration Risk:</b> In the case of DSPBROF, the investment objective is to have portfolio, which has high concentration in select sectors. The sector selection process of the Investment Manager will seek investments in sectors, where there is visibility in earnings. The investors need to be aware of the sector concentration risk as this is the investment objective of the Scheme.</li> </ul>
Applicable to DSPBRITF	<ul style="list-style-type: none"> <li>• <b>Risks associated with companies operating in Infrastructure sector and/or where economic reforms are expected:</b> This is the primary risk in the Scheme as the investment objective is to invest in companies operating in the infrastructure sector and/or where economic reforms are expected. As government policy defines both investments in the infrastructure sector as well as policy reforms, there exists a very high policy related risk. On its part, the endeavour would be to invest in companies, where adequate due diligence has been performed by the Investment Manager. Besides using research inputs from third party research companies, the Investment Manager will also rely on its own research. This involves one to one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance.</li> </ul>

## RISK MANAGEMENT STRATEGIES

Applicable to DSPBRTF	<ul style="list-style-type: none"> <li>• <b>Technology, Media and Telecom Sector Concentration Risk:</b> DSPBRTF has primary investment objective to invest in Technology, Media and Telecommunications sectors. Being a sector fund, it will have higher risk as compared to a diversified equity fund. Besides this, the allocation amongst the three sub-sectors will also influence the performance of the fund. The sector selection process of the Investment Manager will seek investments in sectors, where there is visibility in earnings. The Investment Manager will endeavour due diligence in the sector allocation and stock selection. The investors are informed that a pure sector fund will have high volatility. This risk cannot be defeated and is the primary feature of the Scheme.</li> <li>• <b>Intellectual Property and Individual Risk in Technology, Media and Telecom Sectors:</b> All the three sub-sector are new age sectors and are exposed to disruptive technologies as well as human resources risk. Most of these companies are operating in high growth areas where the future growth and expected scalability drives the price performance. The Investment Manager will focus on companies with strong managements, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance besides financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects and policy environment. The Investment Manager believes the good managements create good and sustainable companies and hence management quality will be a key differentiator</li> </ul>
Applicable to DSPBRGAF, DSPBRWAF, DSPBRWEF, DSPBRWGF, DSPBRWMF and DSPBRUSFEF	<p><b>Risk associated with underlying schemes</b></p> <ul style="list-style-type: none"> <li>• <b>Credit Risk &amp; Market Risk associated with Fixed Income securities</b> will be managed by making investments for cash management purposes, in very short duration fixed income securities (including Collateralised Borrowing &amp; Lending Obligation, also known as CBL), which have high credit quality and are preferably rated A1+ or equivalent by approved rating agencies.</li> <li>• <b>Term Structure of Interest Rates (TSIR) Risk:</b> Term Structure of Interest Rates (TSIR) Risk will be managed by making investments for cash management purposes, in very short duration fixed income securities (including Collateralised Borrowing &amp; Lending Obligation, also known as CBL), which have low probability of negative returns on account of increase in interest rates.</li> <li>• <b>Liquidity Risk on account of investments in international funds:</b> The investments are made in international funds, which provide daily liquidity. However there exists a possibility that different settlement cycles and foreign exchange conversion could leads to delay in receipt of redemption proceeds. To mitigate this risk, daily cash management monitoring is performed by the Risk and Quantitative Analysis (RQA) team by taking into consideration future cash flows on account of redemptions as well as subscriptions into/from the domestic fund. The endeavor is to maintain an adequate liquidity cushion in Indian Rupee terms by making investments in very short term money market instruments and/or liquid schemes in India.</li> <li>• <b>Expense Risks associated with investments in international funds:</b> Any increase in the expense structure of the international funds is not expected to have any impact as the aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI.</li> <li>• <b>Portfolio Disclosure Risks associated with investments in international funds:</b> Although full portfolio disclosure is not available at the end of each month, top ten holdings as well as sector holdings are made available at the end of each month for the international fund. Full portfolio holdings can be obtained from underlying international funds with a three month lag i.e. March portfolio can be obtained at the end of June.</li> <li>• <b>Investment Policy and/or fundamental attribute change risks associated with investments in international funds:</b> Investments are made in such international funds, which have similar investment objectives to the domestic fund in India. However there exists possibility that there is a change in the fundamental attributes of the international fund. In such circumstances, the Investment Manager will seek to invest in other international funds, which have the same investment objective as the domestic fund.</li> <li>• <b>Risks associated with investments in BGF - GAF, BGF - WAF/BGF- WGF/BGF-NEF/BGF-WEF/BGF-WMF/ BGF - USFEF:</b> To the extent of the investments in BGF - GAF, BGF-WAF, BGF-WGF, BGF-NEF, BGF-WEF, BGF-WMF and BGF - USFEF by the respective Schemes, the risks of BGF - GAF, BGF-WAF, BGF-WGF, BGF-NEF, BGF-WEF, BGF-WMF and BGF - USFEF respectively will exist. The investors should note that these risks cannot be defeated as these are international funds managed by BlackRock. However, as part of our due diligence, we have chosen funds, which have long term performance track record, stability of fund management team and are accredited by third party funds evaluators like S&amp;P, Morningstar etc.</li> </ul>
Applicable to DSPBRNRNEF	<ul style="list-style-type: none"> <li>• <b>Expense Risks associated with investments in international funds:</b> Any increase in the expense structure of the international funds is not expected to have any impact as the aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI.</li> <li>• <b>Risks associated with investments in BGF-NEF and BGF-WEF:</b> To the extent of the investments in BGF-NEF and BGF-WEF by DSPBRNRNEF, the risks of BGF-NEF and BGF-WEF will exist. Risks associated with trading in derivatives (Applicable to all Schemes except DSPBRGAF, DSPBRTSF, DSPBRWAF, DSPBRWGF, DSPBRWEF, DSPBRWMF, and DSPBRUSFEF and DSPBRDAAF)	<ul style="list-style-type: none"> <li>• Equity derivatives have been used actively and we envisage this Scheme will also use equity derivatives, both for directional (including equitisation of cash) and yield enhancement strategies. The credit risk associated with equity derivatives is defeated as only exchange traded equity derivatives are permitted. On the performance, portfolio and regulatory limits, there is an established daily monitoring process. As limits could be breached because of changes in the open interest, which is a function of market-wide activity and not specific to the Scheme and are not in control, there are hard and soft limits. Any breach beyond the soft limit is immediately rectified and brought within the limit specified.</li> </ul>
Risks Associated With Overseas Investments	<ul style="list-style-type: none"> <li>• The portfolio is predominantly in INR denominated securities. Should there be investments in ADRs/GDRs of Indian companies or foreign securities, the investment process of the fund manager will ensure that a comprehensive company specific due diligence is performed.</li> </ul>
Risk associated with favourable taxation of equity-oriented Schemes	<ul style="list-style-type: none"> <li>• This risk is mitigated as there is a regular monitoring of equity exposure of each of the equity oriented Schemes of the Fund.</li> </ul>
Risk associated with Stock Lending:	<ul style="list-style-type: none"> <li>• At present, there is no significant activity in the Securities Borrowing and Lending market. ## DSP BLACKROCK INDIA T.I.G.E.R. FUND (THE INFRASTRUCTURE GROWTH AND ECONOMIC REFORMS FUND)

Investment Objective	Please refer to page number 7			
Investment Strategy	It is the Investment Manager's belief that India's future GDP growth will be strongly influenced by the ongoing process of economic reforms. The economic reforms process involves structural changes in various sectors and companies. The primary objective of these initiatives is to accelerate the pace of investment and therefore attract investment capital. Increase in investment capital may result in significant value creation which could be reflected through increased corporate profits and better market capitalisation. The Mutual Fund seeks to capture this value creation potential. The government is also lining up significant spending on infrastructure, The fund will also focus on companies/sectors which will benefit from these unprecedented investments. The Investment Manager will be adopting a combination of the top down approach and bottom up stock selection approach. From a top down perspective, the focus would be on an analysis of key policy changes, infrastructure spending, economic trends, and a sector-wise impact assessment. From a bottom up perspective, the focus would be on an analysis of corporate profitability and the impact of policy changes and infrastructure spending at a micro-level. The Investment Manager will conduct in-house research in order to identify both value and growth stocks. The analysis will focus, among other things, on industry and company fundamentals and valuation metrics. The quality or strength or management would be a key focus area.
